

In a world where energy has increasing costs and environmental impacts are no longer sustainable, **Warmtek** is born with the aim of using more and in a better integrated way environmentally sustainable energies.

The range of pellet stoves **Warmtek** follows this guideline by proposing innovative stoves with features such as:

- Low initial cost and ease of installation
- Savings on the cost of heating
- Auto-ignition, remote control and possibility to turn on through the phone
- Automatic temperature control and ease of use
- Zero-environmental impact
- Possibility to heat apartments and rooms from 30 to 150 m<sup>2</sup>.

To these basic requirements we add an aesthetic pleasing that fits easily in every style with the option to have a finishing touch in painted steel or in elegant ceramic.

The quality of materials, accuracy of construction and advanced technology make these products an investment that will pay for itself quickly and that will keep you pleasantly warm for long time.
